

EVA-MIST Handheld Disinfection Spray Gun

The Eva-Mist handheld disinfection spray gun is lightweight and easy to use which is ideal for disinfecting and sanitising all small applications, from the interiors of cars, vans and mobile homes to many other applications such production areas or workshops, gyms and reception areas.

It uses our Mini Mist air atomising nozzle to create an extremely fine fog spray which is suitable for applying all approved disinfectants and for use on hard surfaces, upholstery and for airborne pathogens. The ultra-fine spray produces droplets fine enough to efficiently sterilise and disinfect the areas it is being used on

The Mini Mist nozzle has been designed into a small, lightweight handgun weighing 390g, with easy on/off trigger operation. The Eva-Mist comes with a 500ml suction cup which you manually fill with your solution, the nozzle then siphons the liquid through the gun and nozzle.

Connection to an airline is required but no power connection is needed.

Please contact an IC Spray sales engineer for more information on the Eva-Mist handheld disinfection spray gun.

Features:

- Fine Fog Spray Produced
- Lightweight Easy to use Design (390gm)
